

CONSERVATIVE

MODEL PERFORMANCE SHEET JUNE 2019

MODEL OBJECTIVE

The conservative portfolio is a low risk portfolio with a large allocation to defensive assets. This portfolio is suitable for investors who are sensitive to short-term losses, but who still have the likely goal of beating expected inflation over the long run. The DLSCM conservative portfolio should have an expected return that outpaces cash by approximately 3% over a 10-year holding period. There should be growth in the real value of assets over the long run, while minimizing risk.

COMMENTARY

Markets have been buoyant, reversing losses experienced in 2018. Developed market equities were up nearly 4% over the quarter and 17% year to date in EUR terms. Credit has also had a good quarter and start to the year. Most government bond indices are also up about 5% year to date, having rallied this quarter.

Confronted by weaker economic data, risks to the trade outlook and still low inflation in Q2, the Federal Reserve (the Fed) and the European Central Bank (ECB) indicated that the cavalry is coming in the form of further monetary stimulus. So bad economic news was good news for markets.

The rally in markets has come against a backdrop of moderately deteriorating economic fundamentals, continued political impasse on Brexit, and increased trade tensions between the US and China. The G20 meeting resulted in the US and China agreeing to keep talking about trade, with no escalation in tariffs but also no significant signs of progress in addressing the key sticking points in the negotiations. The ongoing uncertainty could continue to weigh on business sentiment and consumer confidence.

Growth has slowed in 2Q19, inflationary pressures remained subdued and The Fed maintained its target range for the federal funds rate at 2.25%-2.50% at its June meeting. In the Federal Open Market Committee (FOMC) economic projections, it downgraded inflation materially from 1.8% by the end of 2019 to 1.5%, acknowledging persistently low levels. The market now expects more than 0.5% worth of rate cuts by the end of this year, in sharp contrast to the 0.5% increase in interest rates it was expecting for 2019 back in September 2018. US 10 year yields fell to about 2%.

Rates: EUR/USD 1.14, EUR/GBP 0.90, GBP/USD 1.27
